Restriction of hazardous substances in electrical and electronic equipment (RoHS)

Dear Customer,

The legislation concerning hazardous substances in electrical and electronic equipment is according to the:

DIRECTIVE 2011/65/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the restriction of the use of certain hazardous substances in electrical and electronic equipment

The directive prohibits the import and sale of electrical and electronic equipment, cables, and spare parts, if the equipment contains one or more of the following substances in concentrations higher than stated in the parentheses:

- Lead (0,1 %)
- Mercury (0,1 %)
- Cadmium (0,01 %)
- Hexavalent chromium (0,1 %)
- Polybrominated biphenyls (PBB) (0,1 %)
- Polybrominated diphenyl ethers (PBDE) (0,1 %)
- Bis(2-ethylhexyl) phthalate (DEHP) (0,1 %)
- Butyl benzyl phthalate (BBP) (0,1 %)
- Dibutyl phthalate (DBP) (0,1 %)
- Diisobutyl phthalate (DIBP) (0,1 %)

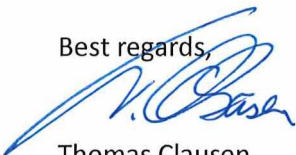

Manufacturers of electrical and electronic equipment must have carried out a conformity assessment procedure, worked out an EU declaration of conformity and CE-marked their equipment. Manufacturers must indicate their name, registered trade name or registered trademark and the address at which they can be contacted, on the equipment or, where that is not possible, on its packaging or in a document accompanying the equipment.

In this connection Solar is considered as distributor and article supplier. This means that Solar makes demands throughout the entire supply chain thus information is passed on where necessary in relation to demands and conditions of the directive.

For Solar to sign statements regarding RoHS, please provide us with specific article numbers.

If you anyway have questions concerning Solar's work with RoHS you are welcome to contact our Master data department on Compliance_MDO_DK@solar.dk

Best regards,

Thomas Clausen
